Compare Your Plan Options

Use the same three plan columns on all pages. This is not an application or recommendation.

Start with the exact plan, year, county, and quote date. Do not enter your Medicare number. For coverage checks, write Verified, Not checked, or Conflicting; include your source and date. Unknown does not mean $0.

Review item	Current plan A	Alternative B	Alternative C
Exact plan name / contract and plan ID / plan type (e.g., HMO or PPO)			
Plan year / county and ZIP / quote date			
Doctors and hospitals: exact location and network status / source and date			
Drugs: coverage, rules, issues / source and date			
Pharmacy location / network status / source and date			
Referrals / authorizations / treatment: source and date			
Extra benefits: eligibility, limits, and rules / source and date			

Confirm information for the exact plan, not just the insurer. Record conflicting answers on page 3.
Use the provider and prescription worksheets for detailed checks when available.

Compare Expected Costs

Plan names: A _____ B _____ C _____

Comparison dates: _____ Months: _____ Use the same services and period for all plans.
Add only non-overlapping estimates. Check whether a quote or tool total already includes premiums.

Review item	Current plan A	Alternative B	Alternative C
Monthly plan premium / drug premium included? Yes, No, or Unknown			
A. Plan premium for this period (monthly premium x months)			
B. Expected medical cost sharing (deductibles, copays, coinsurance)			
C. Expected drug cost sharing (no premiums; use drug worksheet)			
D. Expected noncovered expenses			
Estimated subtotal: A + B + C + D (unknown items stay unknown)			
Part B premium and any other premiums or surcharges, separately			
Source / date / assumptions / premiums already included			

Do not add a deductible twice if it is already in a cost estimate. The subtotal is not your entire Medicare budget.
Record Part B and other premiums separately; account for each once when reviewing your full budget.

MedicareFAQ / Elite Insurance Partners - not a government agency. Keep completed sheets private.

Check Limits and Tradeoffs

Plan names: A _____ B _____ C _____

Limits below describe financial exposure; do not add them to expected costs. Verify plan-year amounts and rules.

Review item	Current plan A	Alternative B	Alternative C
Medical limits: in-network / combined, if applicable			
Drug spending threshold (separate from medical) / year			
Which costs count toward each limit? Source / verification date			
Priority fit: must-have needs met? Remaining tradeoffs?			
Unresolved questions / next action / person responsible / follow-up date			
Decision: keep current / consider / pending. Reason for decision			

A lower estimate alone does not establish a better fit. Resolve provider, drug, and eligibility questions first.

Fictional 12-month example (noncovered costs $0): A: $20 x 12 + $900 + $360 = $1,500;
B: $35 x 12 + $700 + $240 = $1,360; C: $0 x 12 + $1,400 + $600 = $2,000. Part B excluded.
B has the lowest subtotal but hospital access is unresolved, so the decision stays pending. These are not quotes.
